Compost Production Record

Instructions: *Use this form if you produce compost from on-farm and/or off-farm ingredients.* USDA Organic Rule requires that compost systems must combine plant and animal materials with initial C:N ratio between 25:1 and 40:1. Temperature must be maintained between 131°F and 170°F for 3 days (15 days if windrow method and turned ≥ 5 times). Sources of compost materials must be free of heavy metals, or residues of prohibited substances. If you maintain more than one compost pile, please use separate forms for each location. Location of this pile:

Production method: in-vessel static aerated windrow other (specify)

Describe your compost production method:

Ingredient	Source	Lbs or Kg	% of Total	C:N Ratio	Contribution to Total C:N	Residue analysis, if needed
Final C:N Ratio of all ingredients
